PROFESSIONAL SUMMARY

Application Support Engineer with 3+ years of experience in the Banking and BFSI domain, with hands-on experience in SQL-based transaction validation, application troubleshooting, log analysis, and root-cause analysis. Skilled in SQL, Advanced Excel, Power BI, Python, Pandas, and NumPy. Built practical data analytics projects involving data cleaning, exploratory analysis, dashboard development, and business insights. Looking for Data Analyst, MIS Analyst, Reporting Analyst, or Data Support opportunities where I can combine my BFSI domain experience with analytical skills.

TECHNICAL SKILLS

Data Analysis: SQL, Python, Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)

BI & Visualization: Power BI, DAX, Excel, Pivot Tables, Pivot Charts, Slicers, Matplotlib

Domain & Technical: BFSI, Application Support, Transaction Validation, Log Analysis, Root-Cause Analysis, Production Support, Incident Management

PROJECTS

Hotel Booking Analysis | Python, Pandas, NumPy, Matplotlib

- Analyzed 119,000+ hotel booking records to identify cancellation patterns and customer behavior.
- Identified an overall cancellation rate of 37%, with higher cancellations for City Hotels compared with Resort Hotels.
- Analyzed the relationship between booking lead time and cancellation risk, identifying significantly higher cancellation rates for long-lead bookings.
- Cleaned and preprocessed raw data, including handling missing values and investigating data-quality anomalies.
- Compared cancellation behavior of repeat and first-time guests to identify potential customer retention insights.

Computer Hardware Sales Analysis Dashboard | Power BI, DAX

- Built an interactive Power BI dashboard analyzing 5,000+ sales orders from 2020–2022.
- Analyzed sales, profit, products, categories, brands, states, and supervisor-level performance.
- Created DAX measures to calculate sales, profit, quantity, and profit margin.
- Identified top-performing product categories and states to support business performance analysis.
- Used slicers, filters, and interactive visuals to enable dynamic analysis of sales and operational performance.

PROFESSIONAL EXPERIENCE

Application / Technical Support Engineer

Dec 2022 – Present | Bengaluru / Pune, India

- Provide L1/L2 technical support for BFSI applications and transaction-based systems, supporting smooth day-to-day operations.
- Write and validate SQL queries to investigate transaction discrepancies and perform data accuracy checks.
- Analyze application and transaction logs to identify root causes of technical and transaction-related issues.
- Troubleshoot application issues and coordinate with internal technical teams for timely resolution.
- Monitor application performance and logs to identify recurring issues and potential system problems.
- Manage support tickets, incident follow-ups, and issue escalation according to operational procedures.
- Support user account, access, and permission-related activities in accordance with organizational policies.
- Work with business and technical teams to investigate production issues and maintain service continuity.

CERTIFICATIONS

- Cloud Computing + Linux Workshop — CloudDevOpsHub, Sep 2025
- Master Top 10 AWS Services — CloudDevOpsHub, Sep 2025
- Docker & Kubernetes Fast-Track Weekend Learning — CloudDevOpsHub, Aug 2025

EDUCATION

B.Tech – Electronics & Telecommunication Engineering

Shreeyash College of Engineering and Technology, Chhatrapati Sambhajinagar

2024–25 | CGPA: 6.26/10
